

*Extra Credit is offered each week in the form of a POW. You will find the POW @ www.mathcounts.org. You must pick one current problem from the three that are offered during the current week. The format below **MUST** be followed and turned in by Friday of the week the problem is first posted. You can earn 0-20 points based on accuracy and completing the format.*

Problem of the Week Format

Name:

Date:

Class period:

Title of Problem

Paragraph One: Restatement

Include the conditions and data given. Restate the question by putting in your own words what the questions is asking.

Paragraph Two: Explanation

Show all computations (those that worked and those that didn't) neatly, labeled when necessary. Clearly labeling any graphs, charts or lists. Explain in DETAIL what you did and why. Explain the logic you used to solve the problem. This paragraph should be long and very detailed!!!

Paragraph Three: Conclusion

State the solution to the problem. Does it make sense, or do you feel there are errors? Acknowledge any help you received.
